

## EXCEPTIONAL QUALITY, VERSATILITY AND VALUE

The Mat Pro<sup>®</sup> i is a durable and proven mat cutting machine that delivers exceptional quality, versatility and value. The Mat Pro<sup>®</sup>-i pneumatic mat cutter is a unique manual design that incorporates state of the art features, increasing your range, minimising set-up, improving productivity, and eliminating common problems. With the Mat Pro<sup>®</sup>-i, the pneumatic clamping feature holds the matboard firmly in place and you no longer have to rotate your mat in order to cut your openings. The pneumatic cutting head provides precision and maximum control, and the smooth blade insertion eliminates hooking and increases accuracy.

An ergonomic grip reduces strain on production runs while providing maximum comfort. Patented magnetic stops ensure smooth straight lines. Rotating measuring stops provide instant offset for repetitive cuts, and allow quick and simple cutting of pre-assembled multi-layer mats. There is no need for removing and replacing each layer.

TECHNICAL DATA	
Working area	1500 x 1000mm
Dimensions	1950 x 1900 x 600mm
Weight	120kg
Pneumatics	90PSI (6 bar)

Mat Pro<sup>®</sup> i Interchangeable Heads

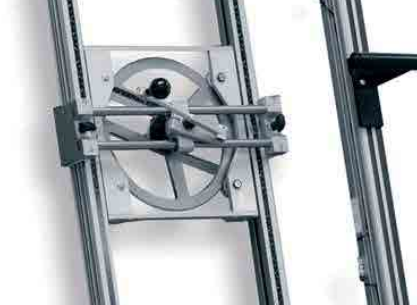

4 optional cutting heads for the Mat Pro<sup>®</sup> i available:

- Red 45° front bevel cut
- Yellow 90° multi material
- Purple embossing tool
- White 90° matboard

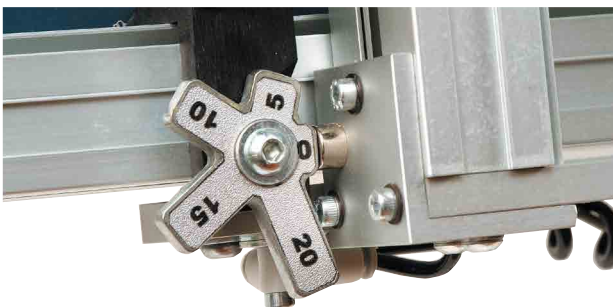

## Cutting Head and Blade

- Patent design
- Durable long lasting
- Cost effective
- Minimised blade changing and down time
- Recycle cutting blade to optional end trimmer

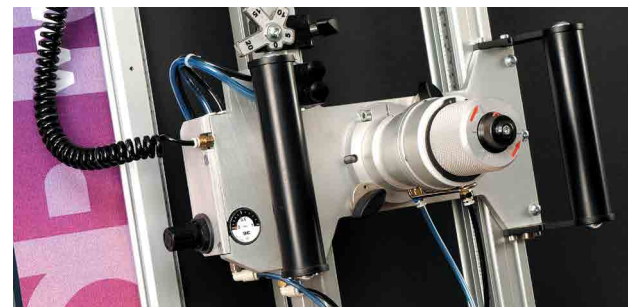

## Optional Oval/Circle Cutter

- Supplied with 3 Heads, for bevelled matboard cuts, glass and matboard decoration
- Easily installed

## Measuring Stops

- Unique rotating measuring stop
- Allows 20mm movement without readjusting your settings
- Preset setting 0-20mm, with 5mm increments
- Incorporating magnetic lock device

## Ergonomic Grip Handles

- Free flowing design
- Push button cutting system
- Tireless operation
- Sturdy construction

## Production Stops

- Dual production stop system allows quick set and trim for mass production
- Quick and easy to read scale
- Includes two production stops

## Optional End Trimmer

- Used for squaring and trimming matboard and foamboard to size
- Quick change magnetic blade holder
- Pneumatic clamping
